

Jordi Giménez

Backend Engineer

PROFESSIONAL SUMMARY

Backend engineer with over 5 years of experience specializing in JVM languages and microservices architectures. Passionate about building highly scalable APIs and optimizing complex database performance under heavy traffic.

EXPERIENCE

Backend Developer

Jan 2021 – Present

Novatech Solutions

- Developed core transactional microservices using Spring Boot, increasing platform throughput by 25%.
- Optimized PostgreSQL queries and implemented Redis caching, reducing API response times from 300ms to 80ms.
- Integrated third-party payment gateways and secured API communication using OAuth2 protocols.

Junior Backend Developer

Sep 2018 – Dec 2020

Turia Systems

- Maintained and enhanced RESTful APIs in Java, collaborating closely with frontend team members.
- Wrote automated unit and integration tests using JUnit and Mockito, achieving 85% test coverage.
- Assisted in migrating legacy PHP monolith components to structured Spring Boot services.

EDUCATION

BSc in Computer Science

Sep 2014 – Jun 2018

Universitat de València
