

Marta Alarcón Ferran

Full-Stack Engineer

marta.alarcon@fakemail.dev · +34 699 987 654 · Barcelona, Spain

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 7 years of experience designing and scaling complex web systems. Expert in Node.js backend architectures and frontend frameworks, with deep knowledge of relational and non-relational database design.

SKILLS

Node.js

Express

NestJS

PostgreSQL

MongoDB

React

Angular

TypeScript

Docker

AWS (S3, EC2)

Redis

Jest

EXPERIENCE

Senior Full-Stack Engineer

Jun 2021 – Present

Glovo Systems

- Designed and implemented a scalable microservice using NestJS and PostgreSQL to handle real-time delivery inventory updates, serving 5,000+ requests/sec.
- Led a team of 4 engineers in migrating an administrative portal from Angular to React, resulting in a 40% reduction in client-side bundle size.
- Optimized relational database queries and introduced Redis caching layers, successfully reducing average API latency by 120ms.

Software Engineer

Mar 2018 – May 2021

Netrivals

- Developed dynamic, data-intensive web dashboards using Node.js and React to track competitor price-scraping metrics.
- Containerized development and staging application environments with Docker, shortening onboarding setups for new engineers from 3 days to under 2 hours.

Junior Developer

Sep 2016 – Feb 2018

AppBuilders BCN

- Maintained and added new backend endpoints to mobile-responsive web apps using Express and jQuery.
- Wrote automated integration tests and resolved complex SQL query performance issues in Postgres database instances.

EDUCATION

B.Sc. in Computer Engineering

Sep 2012 – Jun 2016

Universitat Pompeu Fabra
