Mateusz Kowalski

Android Developer

PROFESSIONAL SUMMARY

Senior Android Developer with 8+ years of experience crafting high-performance, user-centric mobile applications. Proven track record of optimizing application performance, migrating legacy architectures, and mentoring team members in modern Kotlin development practices.

EXPERIENCE

Senior Android Engineer

Mar 2021 – Present

VeloByte Warsaw

- Led the architectural migration of a core mobile banking app to Jetpack Compose, improving UI rendering performance by 25%.
- Established automated continuous integration workflows using GitHub Actions, reducing deployment errors by 15%.
- Mentored 4 junior and mid-level Android developers through pairing sessions and comprehensive code reviews.

Android Developer

Jan 2018 – Feb 2021

PixelKraft

- Refactored a monolithic codebase into a highly modular MVVM structure, achieving a 40% reduction in crashes.
- Implemented offline-first capabilities using Room database and secure local data synchronization.

Junior Android Developer

Jul 2015 – Dec 2017

AppLab Poland

- Developed and launched 3 commercial Android applications from requirements to publishing on Google Play.
- Integrated third-party APIs and libraries for analytical tracking and push notifications.

EDUCATION

Master of Science in Computer Science

2010 – 2015

Warsaw University of Technology
