

Sven de Jong

Backend Engineer

sven.dejong@fakemail.dev · +31 6 1234 5678 · Amsterdam, Netherlands

PROFESSIONAL SUMMARY

Staff Backend Engineer with over 12 years of expertise architecting high-throughput distributed systems. Recognized for scaling cloud infrastructure, leading core framework design, and mentoring multi-disciplinary engineering teams.

EXPERIENCE

Staff Engineer

Mar 2021 – Present

FinFlow Tech

- Architected a real-time transaction processing engine scaling to 50k requests per second utilizing Python, Go, and Kafka.
- Established and communicated long-term technical direction for three cross-functional backend engineering teams.
- Standardized Infrastructure-as-Code setups with Terraform, leading to a 50% decrease in environmental provisioning times.

Principal Engineer

Sep 2016 – Feb 2021

UtrechtLogix

- Led a complex modernization project migrating a legacy PHP monolith into a distributed microservices architecture in Python.
- Optimized the storage tier costs by 40% through a strategic migration to Apache Cassandra and DynamoDB.

Senior Software Engineer

Nov 2011 – Aug 2016

Amsterdam Data Corp

- Designed high-performance backend pipelines that ingested and processed multiple terabytes of telemetry data daily.
- Introduced standardized CI/CD practices which decreased critical deployment incidents by 70%.

EDUCATION

Master of Science in Computer Science

Sep 2009 – Jul 2011

Delft University of Technology

SKILLS

Python · Go · Distributed Systems · AWS · Kubernetes · Apache Kafka · Cassandra · Docker · Terraform · System Architecture · gRPC

LANGUAGES

Dutch (Native) · English (C2)
